

COVID-19 RESEARCH POSTER

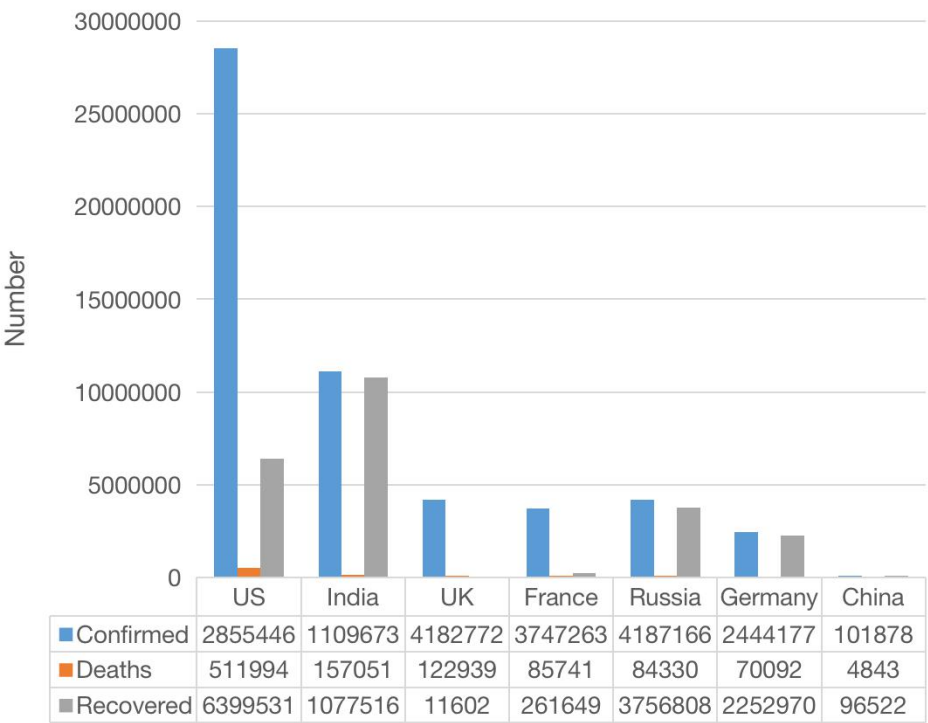

Introduction

Coronavirus has undoubtedly been the topic of most interest and concern during the past year. Daily data on the number of confirmed cases, the number of deaths, the number of cures and the speed of transmission of the virus reflect the infection in different countries.

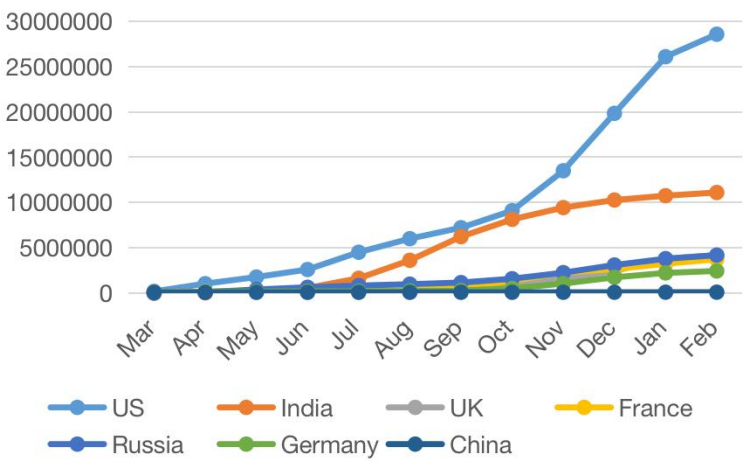

Share of Confirmed Cases

2020 Mar ~ 2021 Feb

Confirmed Cases Per Month

Data Analysis

Through this analysis, we may draw a conclusion that the global COVID-19 outbreak starts mainly around September or October 2020, when the number of confirmed cases starts to surge. Despite its ups and downs, the deaths rate in each country is generally at a low level. The increase in the number of confirmed cases in each country is also slowing down, indicating that the COVID-19 may be effectively controlled to some extent.

	US	India	Russia	UK	France	Germany	China	Total
Deaths/Confirmed	1.79%	1.42%	2.01%	2.94%	2.29%	2.87%	4.75%	1.91%
Recovered/Confirmed	22.41%	97.10%	89.72%	0.28%	6.98%	92.18%	94.74%	43.37%
